

Where in the United States did my food come from?

Where did your lunch come from? Some of the foods you eat every day are produced here in Utah. Most states produce their own milk, eggs, fruits, vegetables, and grains. Some states produce so much of a particular crop or animal that they have become famous for their agricultural products. Color the small circle on the legend and then color a small circle on the map to match the legend of our most productive states in the United States. Do you see some regional patterns?
