

Zip-lock bag felting with children!

1. Gather materials: One sandwich sized zip-lock bag, wool roving and warm soapy water.

2. Lay out the design.

3. Insert carefully into the zip-lock bag.

4. Pour in enough warm soapy water to completely saturate the wool.

5. Once the wool is wet, lay the bag flat on an absorbant towel and starting from the bottom of the bag, press it with your hand flat moving it towards the top of the bag squeezing out most of the excess water.

6. Now is the fun part. Seal the bag at the top and start working the wool. Poking it and pounding it with little fists until the wool becomes firm and felt like.

7. After the wool has felted, remove from the bag and gently rinse in water, alternating hot then cold. Roll the felt in a towel to squeeze out any excess water, and lay flat to dry.

Three felt squares!

One piece simply framed!
